Facial Emotion Detection Neural Net

CNN model trained to detect
happy, sad, neutral, and
surprise emotions

PYTHON

AI

MACHINE LEARNING

[View Project](#)

- Description, USPs, Pill tags for projects with link to GitHub like this but should also include a visualization like “featured” in linkedin

Car Hail Damage Repair

A comprehensive solution that streamlines vehicle damage assessment using AI technology. This innovative system allows users to upload images of damaged vehicles and receive instant analysis of damage severity and repair options through a portable device.

 User-Friendly Web App with Flask

 Smart Image Processing with OpenCV and Pillow

 Machine Learning Analysis powered by TensorFlow

 Efficient Data Processing with NumPy

Python

Flask

TensorFlow

OpenCV

NumPy

- Skills in separate sections
- Email, linkedin, GitHub in contact
- Contact should have: email as a mailto link, linkedin hyperlink, GitHub hyperlink, resume button like this

More ways to find me!

 [LinkedIn](#)

 [MIT ADSP Portfolio](#)

 [GitHub](#)

[Download Resume](#)

Email: timothyj.newbold@gmail.com

- Experience section exactly like this except for lead or co-lead or whatever (i.e it just shows short description and when I click on view details a dialogue overlay should open containing highlights, problem, approach, outcome and stack (the stack should be the pill tags)):

- Should be kinda dark mode
 - layout
 Hero
 =====
 name
 title

2 lines about me

2 buttons: view resume, get in touch

About

=====

2 or 3 small paras about me

3 cards containing quantitative metrics like:

2 years production experience

35M+ events processed daily

5B+ records in batch systems
